ROCKLAND ELECTRIC NEWSROOM

FALL 2026

Rockland Electric Company provides year-round support for our customers. Learn more about how we continue to improve service, help our customers with bills, and other important companywide news.

Fueling and Strengthening the Economy

Rockland Electric Company doesn't just provide our customers with some of the most reliable energy in the Northeast, we have a significant impact on our local economy, too. Our latest Economic Impact Report conducted by HR&A Advisors shows that in 2025, we generated $2.4 billion in economic output in our service territory, spent $70 million on contracts with local businesses, supported nearly 4,000 jobs across our region, and provided significant energy bill discounts to low-income customers.

HOW WE'RE HAVING AN IMPACT

Investing in a More Weather-Resilient System

Over the summer, Rockland Electric Company continued work on Ewing Avenue in Franklin Lakes where we're replacing over 6,000 feet of overhead electric cable, allowing the system to become significantly more resilient to storm-related disruptions and better withstand environmental impacts like tree contact. As extreme weather events become more frequent throughout New Jersey, the Company is strategically investing in our electric grid to enhance service reliability for our customers.

OUR RESILIENCY PLAN

Need Relief from High Summer Bills?

This summer saw significantly high temperatures, including a historic heat wave in early July. When temperatures rise, air conditioner usage soars, resulting in higher energy bills. We understand these challenges, and we're here to help you. See if you qualify for programs that may lower your monthly bill, provide financial assistance, or help manage past-due balances.

CUSTOMER BILL ASSISTANCE

Earn Money for Old Appliances

Are your old air conditioners or dehumidifiers collecting dust in your attic or basement? You can bring these appliances to one of our upcoming Appliance Recycling events at The Home Depot in Mahwah and earn a $50 rebate for each eligible unit (limit four appliances per event). It's a fast, rewarding way to declutter this fall and put some cash in your pocket while recycling responsibly.
